

Know your generator will start — before you need it.

Your standby generator waits all year for one moment. Most failures happen quietly between service visits — PowerWatch watches around the clock so they don't catch you in the dark.

WITHOUT MONITORING — IT FAILED, HE NEVER KNEW

WITH POWERWATCH — TOTAL PEACE OF MIND

WHAT POWERWATCH DOES

- Catches a weak battery — the #1 cause of a no-start
- Flags a missed or failed weekly self-test
- Alerts on faults or a generator that left AUTO mode
- Tracks run times and engine hours
- Alerts by text and email to as many people as you want
- Own cellular signal — works even when your internet is down

WHY IT'S EASY FOR YOU

We already service your generator, so we know your exact unit. There is nothing for you to set up. We add the small monitor at your next visit — and you get peace of mind between now and then.

LIFETIME HARDWARE WARRANTY

The monitor is covered for life. Monitoring supplements — never replaces — your annual generator maintenance.

Total PowerWatch
